Dear Hiring Manager,

Hope this letter finds you well.

I am writing this letter to you to apply at your company. I would like to first take this opportunity to introduce myself as a final year student at the Sam Higginbottom University of Agriculture, Technology, and Sciences, pursuing a B.Tech degree in Computer Science and Engineering. My expected graduation date is June of 2021. I am currently looking for full-time permanent positions with esteemed organizations like yours.

My curriculum comprised of courses like Database Systems (SQL), Analysis of Algorithms, Web Technologies, Software Engineering, Networking, etc. has assisted me to gain profound knowledge in the field of Computer Science. Currently, I hold a total of 7.55(CGPA) and have been a good student the entire term of my study at the University.

While attending academic classes, I also focused my personal interest in Python and Machine Learning for which I took training for 30 days at AVD Technology and learned them in detail. My focused study helped me develop some projects like “Pandemic Quarantine Information System, Shepherd Library Management System (SLIMS), Know Your Weather App”.

In addition to the above, I strongly believe in learning and sharing my knowledge with my colleagues. “Knowledge parted is knowledge gained” has been my motto in life. I am keen to learn and am sharp at identifying and solving problems.

I am confident that my background and knowledge in the (Information Technology) arena coupled with my strong technical skills in software languages will prove an asset to your organization and add immediate value to your organization.

I have enclosed my resume and would appreciate an opportunity to talk with you. Should you have any questions, please feel free to contact me. I look forward to hearing from you soon.

Sincerely,

Ravi Raj
